This training document will show you, step-by-step, how to create a template that looks like the above screenshot and that enables any customer to control, using the QR code and a mobile device, what templates are displayed on screen.

sedao™

Sedao Creating a template with QR Code Control

LOGO

YOUR HEADING HERE

Intro text here

Text Box One   Text Box Two   Text Box Five

Text Box Three   Text Box Four   Text Box Six

STEP 1 Log into your account as normal

STEP 2 Choose a template with a large image area in, this one is a good one as the QR code fits in the middle

sedao™

Sedao Allocating created content to QR code

STEP 1 Login to your Sedaolive account. Then click PRESENTATIONS

STEP 2 Then click the virtual button icon. Note: you will need to have created the presentations you want the customer to control already

You will need to create virtual buttons that appear on the customers mobile device once the QR code is scanned so that they can control the screen.

Sedao Allocating created content to QR code

STEP 3 Press add to create your virtual button(s)

Once created your buttons will appear here

You will need to have created Presentations already for the buttons to work. You will also need to have a Sedao Player/Clevertouch linked to your account

Sedao Creating a QR virtual button on Screen

STEP 4 Give the button a name, if you choose not to have a full picture as the button this is what the customer will see

STEP 5 Choose what you want the button to control. This will likely be the screen you're planning to have the QR code presentation on
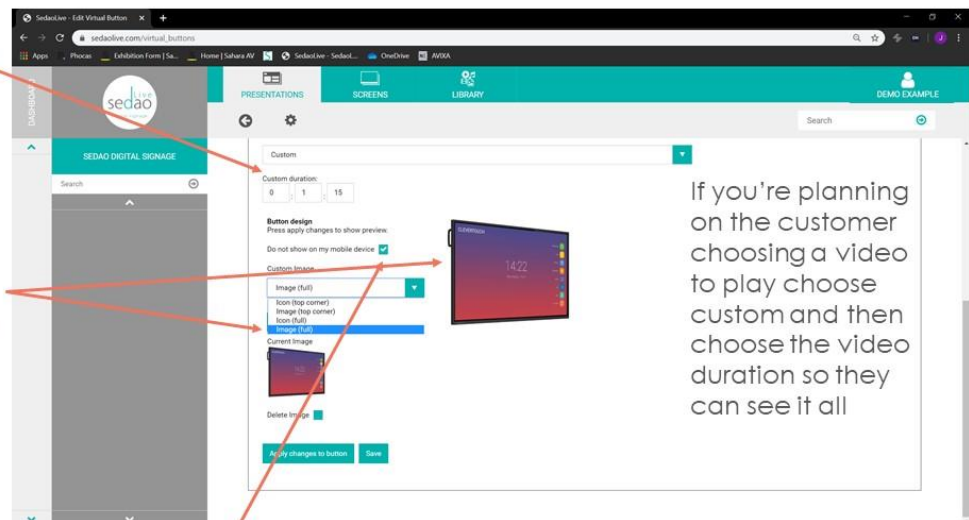

STEP 6 An announcement is recommended as it will revert the screen back to the QR code presentation once the time has elapsed.

Sedao Allocating created content to QR code

STEP 7 Choose the how long you want the template to appear on screen.

STEP 8 Most people choose full screen image as it will look better on the customers device but you could choose a smaller icon with text

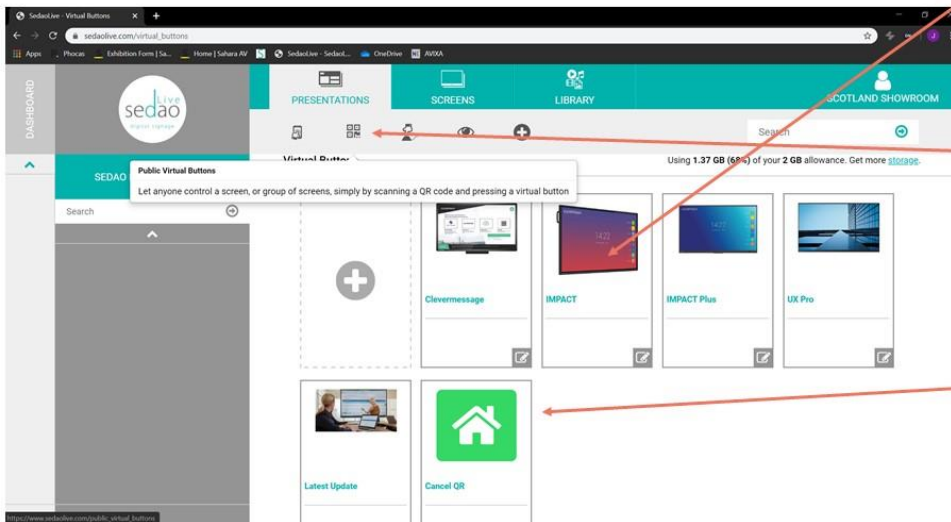

If you're planning on the customer choosing a video to play choose custom and then choose the video duration so they can see it all

I have clicked Do not show on mobile device as we don't want staff controlling the screen by accident. This means the only time anyone can press this virtual button is when they scan the QR code

Sedao Creating the QR Code

These are the buttons that will appear on a mobile device when the QR is scanned

STEP 1 Once your buttons are created press the QR code button

I would create a "home" virtual button in case a customer wants to go back to the home screen or cancel their button press
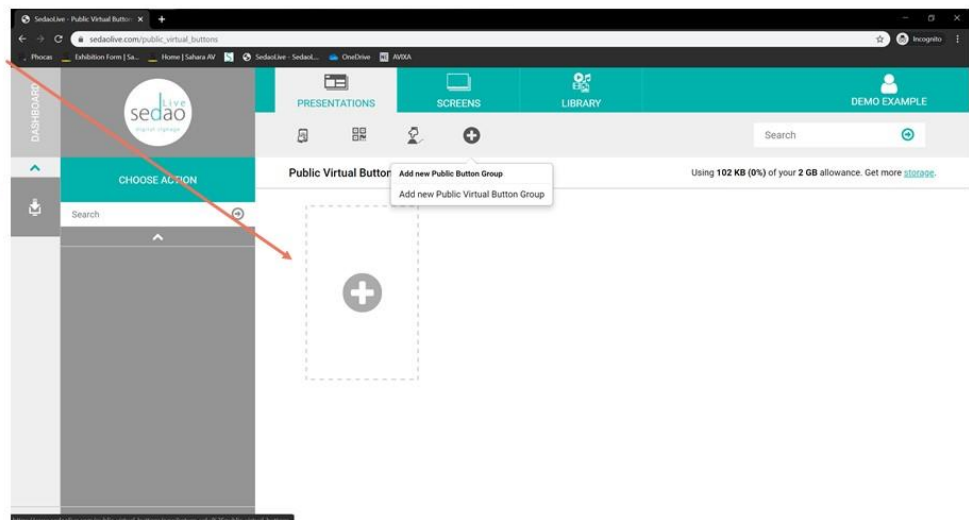

All the buttons you've created will be here, check them all now to make sure they are going to the same screen or group. Check they look like you want them and they have the correct play duration on when pressed.
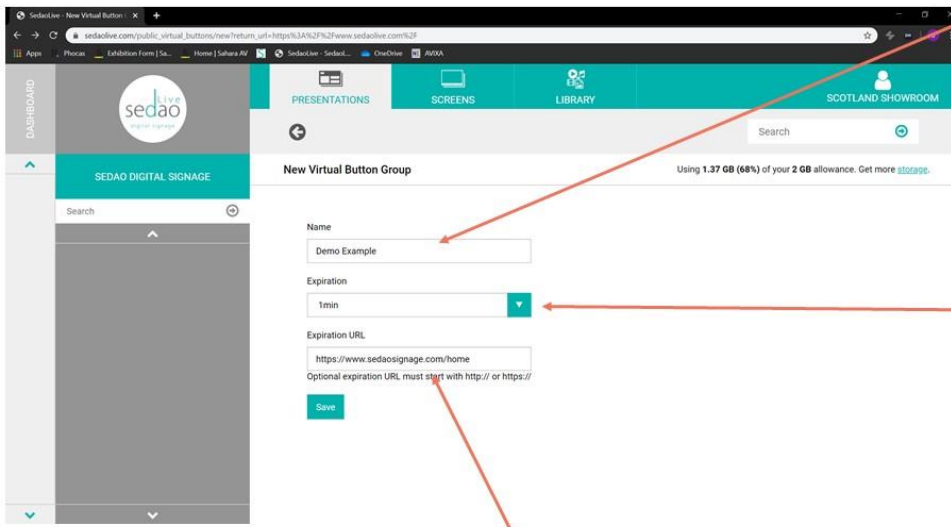

Sedao Creating the QR Code

STEP 2 Click the add button(s) in order to create a QR code

Sedaolive creates the QR code automatically so no need to worry about making one yourselves

Sedao Creating the QR Code

STEP 3 Give the QR code a name to identify it if you've more than one created
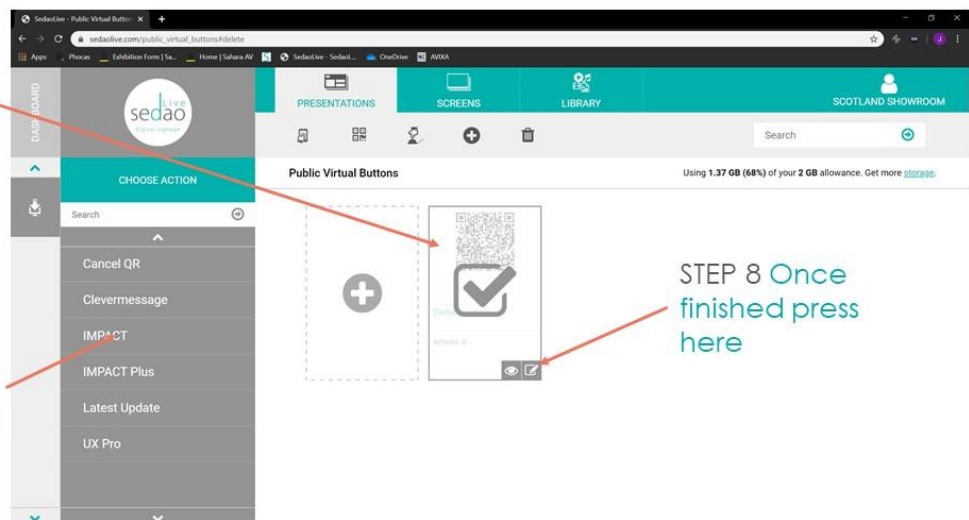

STEP 4 Choose an expiration time. This is for the customers mobile device. In this case, after 1 minute they will be automatically diverted to the expiration URL

STEP 5 Choose the "Expiration URL" as a website that could promote whatever the buttons are showing on the screen

Sedao Creating the QR Code

STEP 6 Click on the QR code and the buttons we created for a mobile device earlier will appear on the left

STEP 7 Drag the buttons and drop them onto the QR code. Only drag the ones that you want to appear when the QR code is scanned

STEP 8 Once finished press here

Sedao Creating the QR Code

This page allows you to check the buttons one final time. This will be how they look on a mobile device once the QR is scanned
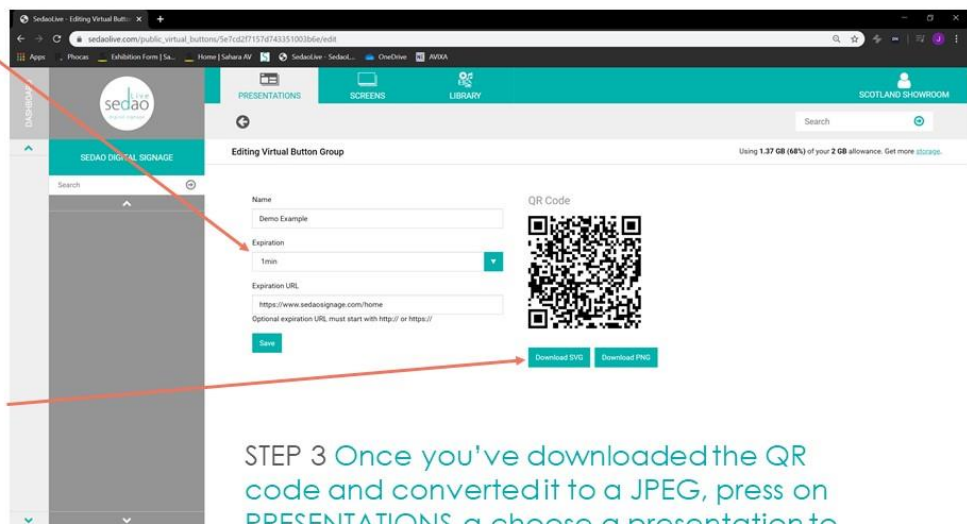

If you need to add more press the back button and restart the steps

STEP 9 Once happy press the settings button as we need to save the QR code to then put it in a template to display it on a screen

sedao™

Sedao Downloading the QR Code

STEP 1 Final checks that this information is all correct

STEP 2 Download the QR code. Bear in mind you will need to convert the file into JPEG so choose whichever format is easiest for you to convert

STEP 3 Once you've downloaded the QR code and converted it to a JPEG, press on PRESENTATIONS a choose a presentation to add the QR code to

sedao™

Sedao Assigning the QR Code

STEP 1 Click the area on the template you want to upload the QR code too
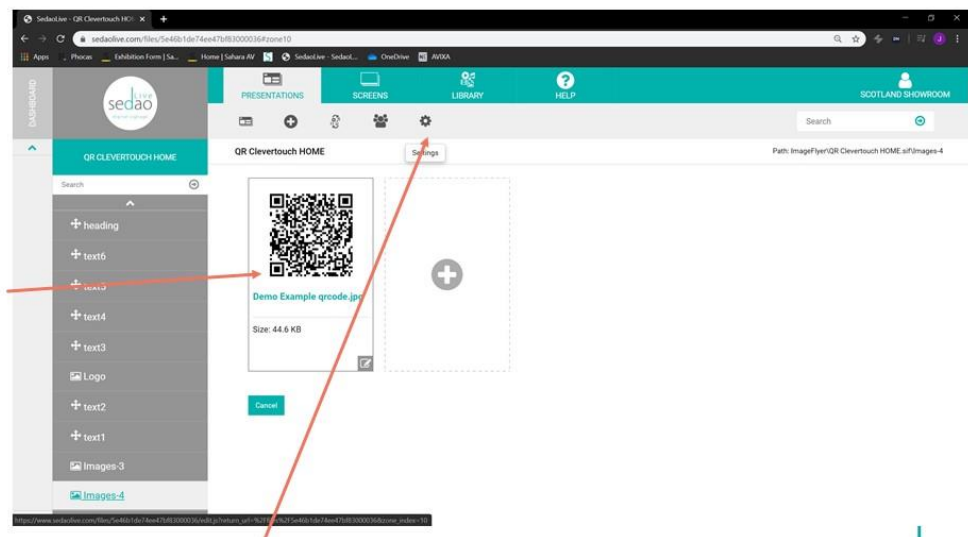

This is an example of a template you could use. Any template with an image area could be used for this
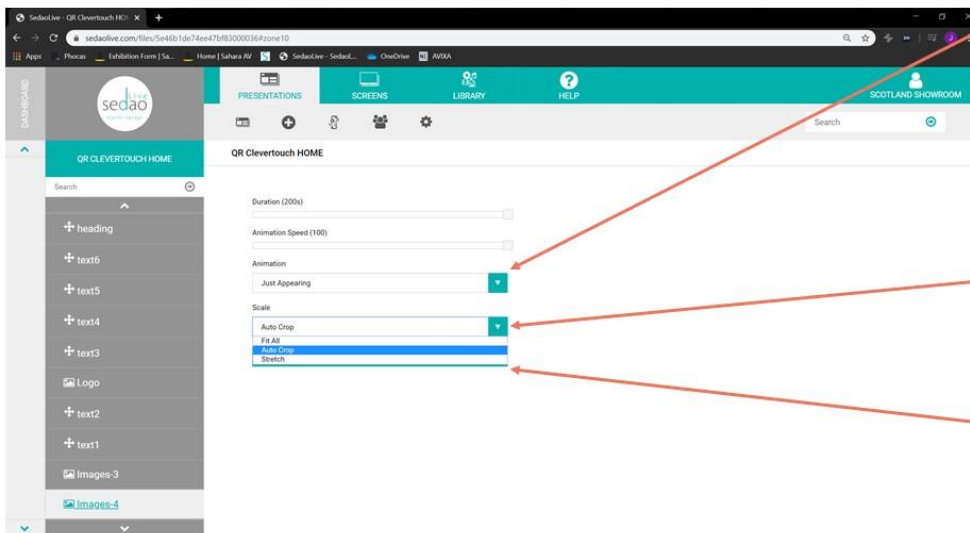

Sedao Uploading the QR Code

STEP 1 Upload the QR code as you would a normal image (make sure it's in the right format as PNG won't work)

STEP 2 You will need to change how the image is viewed using the settings button
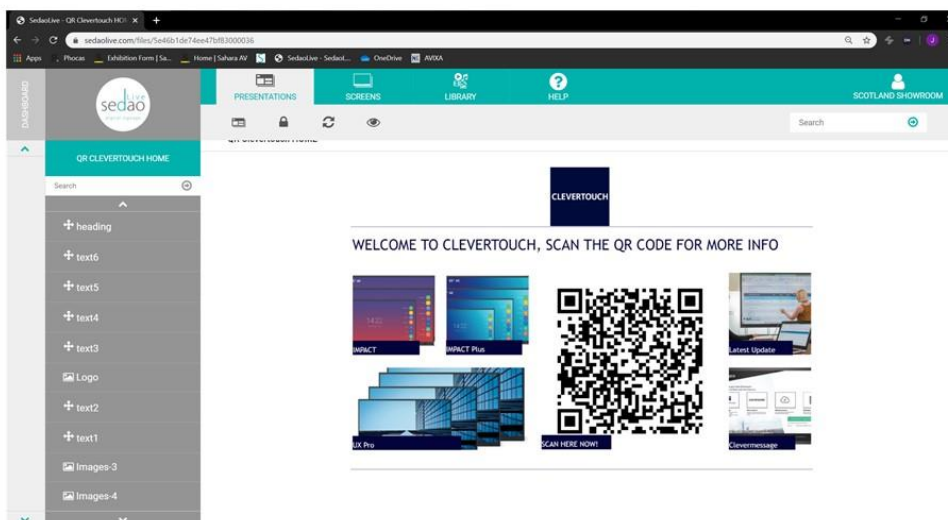

Sedao Uploading the QR Code

STEP 3 Change the settings so that the QR code is always viewable so customers can always scan it

STEP 4 Play about with the scale so that the whole QR code is viewable on the template
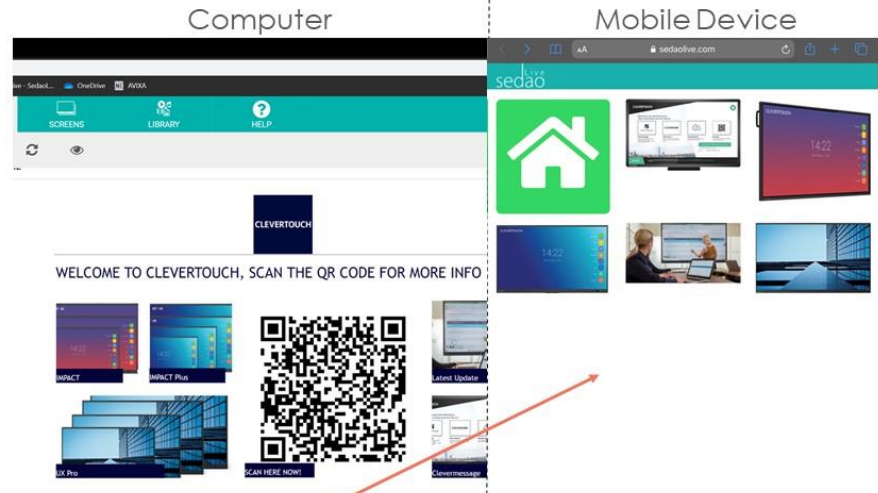

STEP 5 Press save to advance

Sedao End Result

WELCOME TO CLEVERTOUCH, SCAN THE QR CODE FOR MORE INFO

Sedao Testing the QR Code

Computer

Mobile Device

You should be then able to scan the QR code with a mobile device to check the buttons work. They should appear on your device like the image here.

This is what the mobile device should look like. The QR code should send you to a browser showing the buttons you created. Check they all look correct and there are no missing buttons

![sedao logo]

Sedao Testing the QR Code

Mobile Device

Sedao Player

STEP 1 Assign the QR Presentation to a Sedao Player

STEP 2 Scan QR with device and press all of the buttons to make sure they work

STEP 3 Buttons should have changed the screen to show the appropriate presentations

It's worth watching a presentation all the way through to make sure the screen defaults back to the QR code

![sedao logo]
